

Adding an Objective

When you come to edit a curriculum, you may find the existing Learning Objectives are not sufficient for your needs and you wish to add further objectives.

To add a Learning Objective, navigate to the key stage, subject and curriculum you wish to change, then:

- Click **Edit** in the top-right corner
- Scroll down to the end of the Year group section. For this video, I'm going to add an Objective to Year 8
- Click on the blue **+ Learning Objective** button
- A new row appears, with an orange + icon. This denotes that the Objective is a new objective.

Other than the icon denoting it is a created, this Learning Objective is exactly the same as any existing objectives and can be assessed against in the usual way.

If you wish to make a sub-objective, hover over an existing objective and click the blue + icon. This will create an objective as a child of the original. You can use the grab-handles to move the new objective out of this area. **Watch the Grouping Objectives video for more information**
