

## My Personal Timeline

Every student in Frog gets their own personal timeline. This is a record of every activity you have been involved in with Frog.

For instance, when a teacher sets you homework, it will appear here – as well as in the MyFrog menu.

Any sites that are shared with you will also appear as links here too.

You can't see anyone else's timeline, only your school's admins can see that, but you can upload files and share them from here.

Your parents also get to see your timeline.

**To upload a file**, simply click the Upload button. Follow the instructions onscreen to either browse for a file or drag one into the draggable area. This will upload the image to your FrogDrive as well.

I can also see any images, audio and video I've uploaded via the FrogSnap app.

If I want to share this file with someone:

- I click on the **Action Cog** and choose **Send a copy to**.
- Now I can search for someone, click their name and hit **Send**

The person who receives this file can send a Like back or even a message.

If you're waiting on a response, there's a refresh button on the timeline.
