SAVING MONEY

REDUCING TEACHER WORKLOAD

IMPROVING OUTCOMES

Giving students a voice

FROM **NORTH LAKES SCHOOL**

Story

It can be difficult for some children to contribute to class discussions because they lack the confidence to speak up. **FrogLearn** helped us to reach the least confident children in the class by providing a digital space that they could interface with. We created a poll and a comments wall to encourage communication.

Impact

Creating this space enabled the children to feel more confident, it has given introverted students who wouldn't normally have a voice— a voice. It also gives teachers a much better understanding of the outcomes.
