

A top-down view of a desk with a laptop, keyboard, mouse, and a small plant. The laptop screen shows a website with a calendar. The keyboard is white, and the mouse is black. A small green plant is in the top right corner.

## Date Picker Field

The Date Picker field allows users to select a date using a **calendar** found within a form. When building a form and adding the date picker field to the form canvas, you have the ability to give the field a label.

The form I'm building is being used as a way for parents to submit requests for their child to attend a morning or after school club, so I'll just add a note to ask parent to input the date they want their child to attend.

In the description field, I'll add a note to ask parents to book at least 2 days before the requested date and if it is after this date, they must also ring the school.
