

A top-down view of a desk with a laptop, keyboard, mouse, and papers. The laptop screen shows a website with a person's photo. The keyboard is white, and the mouse is black. There are some papers and a small plant on the desk.

Attainment Table

The attainment table widget will display all attainment information associated with a student in a table format. An administrator is able to set what results sets are displayed in the table so if you think any information is missing, please contact your school.

The attainment table widget is used in conjunction with a select user widget and a select subject widget. If you only have one child in the school, you won't need to select a user as your child will automatically be populated in this widget. If you have more than one child, you will be able to select which child's information is displayed by choosing them using this widget.

The select subject widget seen here allows parents to filter the information displayed in the attainment table to only show the data associated with the selected subject. As you can see, the attainment table is currently displaying the attainment information for all subjects. If I click on the drop-down menu and select maths, the table will only show the maths attainment information.
